New Horizons 1997

The Lexington-Concord Chapter of the Armed Forces Communications and Electronics Association (AFCEA) in participation with the USAF Electronic systems Center was pleased you were able to attend our New Horizons Symposium for 1997.

As a new, added value for your participation, we have produced this CD-ROM which contains all the briefing slides presented during this year's symposium in two different forms:

1. The ***"Horizons.pdf"*** contains all the briefing slides in the order they were presented in one document. Each speaker's briefing is listed on the "Agenda" pages (pages 3 and 4), and each is subsequently hyperlinked to that specific briefing. "Horizons.pdf" also allows you to do "keyword" searches through all the presentations at once.
2. For those who may have a need to have one particular briefing set, we have also included all the individual briefings as separate files. They are contained in the file marked ***"Briefings."*** *(These files may, for example, be attached to e-mail correspondence. Do not attempt to send the "Horizon.pdf" via e-mail; it's too large for most systems.)* Page two of this file contains an index of all our speakers and the individual briefing file names for their presentation slides.
